Video Demo Requirements for UECS3294 Advanced Web Application Development Assignment

You need to create a 15-minute recorded demo video showcasing your Laravel web application, along with a brief walkthrough of your code. The video should be clear, well-organized, and cover the features and functionalities that have been implemented, as per the assignment instructions. Here is a suggestion for your video content Structure. Students are allowed to have different structure but make sure that cover all the requirements.

Video Content Structure (15-Minute Demo)

1. **Introduction (30 Seconds)**
   Briefly introduce the name of your web application and describe its purpose.
2. **Functional Walkthrough (6 minutes)**

- **User Registration and Authentication:**
  - Show how a user can register and log in to the system.
  - Demonstrate the login screen and successful login process.
  - Show the logout functionality.
- **Dashboard/Welcome Page:**
  - Show the page where authenticated users ill be directed after logging in.
  - Highlight the features the user can access based on their role (e.g., admin, author, user).
- **CRUD Operations:**
  - Show the process of creating a post (for an author or admin).
  - Demonstrate viewing a post.
  - Show editing and updating a post.
  - Demonstrate deleting a post (only for authorized users).

- **Validation and Error Handling:**
  - Show how input validation works during post creation or editing.
  - Show validation messages if the user inputs invalid data.
- **Search and Filtering:**
  - Demonstrate relational queries, search filters, and displaying posts based on search criteria.

3. Code Walkthrough (6 minutes)

- **Database Design & Migrations:**
  - Briefly explain the structure of your database.
  - Mention how you have set up migrations for the tables (and any relationships).
- **Models and Relationships:**
  - Walk through your models (e.g., User and Post) and explain the relationships between them.
  - Show relevant code for the User and Post models (e.g., hasMany, belongsTo).
- **Sessions and Cookies:**
  - Show how you implemented sessions or cookies for storing user data.

4. Authentication and Authorization Logic (Gates/Policies) (2 Minutes)

- **Authentication Logic (if applicable):**
  - Briefly explain how user authentication is implemented in your application.
- **Authorization Logic and Role-Based Access Control (RBAC) (if applicable):**
  - Briefly explain how authorization is handled using Gates or Policies.

5. Closing (30 Seconds)

Video Recording Tips:

1. Clarity: Speak clearly and at a moderate pace. Make sure every important feature is explained.
2. Visual Quality: Ensure your screen is visible and readable.
3. Code Highlighting: When explaining the code, highlight or zoom into the code sections you're talking about so the viewers can follow along.
4. Stay on Track: Keep the video within the 15-minute limit. Prioritize key features and code walkthroughs over minor details.
5. Professionalism: Avoid unnecessary background noise or distractions.
6. Prepare Ahead: Plan your video ahead of time and rehearse if necessary, to ensure a smooth flow of content.

Video Submission:

- **File Format:** The video should be submitted in a commonly accepted format like **MP4**.
- **Upload Instructions:** Please upload the video to your Google Drive and include the sharing link in a README file. Submit the README file through WBLE.

Best of luck! 😊
